Address: Hanoi, Vietnam

SUMMARY

Front-end Developer with 5+ years of experience building large-scale web applications using React and [Next.js](#). Specialized in performance optimization, map-based applications, and scalable front-end architecture.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS
- Frameworks & Libraries: React, Next.js, Angular, Node.js
- State Management: Redux, Zustand
- UI & Styling: TailwindCSS, SCSS, Material UI, Radix UI
- Testing: Jest, React Testing Library, Vitest
- Performance & Optimization: Lighthouse, PageSpeed Insights, Core Web Vitals
- Tools & Architecture: Turborepo, Plasmic (low-code landing page builder)
- Automation Specification-Driven Development (SDD), BMAD development workflow, n8n automation

EDUCATION

University of Engineering and Technology (UET - VNU)

08/2017 - 06/2021

- BSc in Information Technology
- Degree grade: Very Good – GPA 3.28/4

PROFESSIONAL EXPERIENCE

One Mount Real Estate — Senior Front-end Developer

09/2023 - Present

Project: [OneHousing](#) – Comprehensive Real Estate Ecosystem

- Tech stack: Turborepo, NextJS, ReactJS, TypeScript, Zustand, Radix-UI, TailwindCSS.
- Responsibilities:
 - Optimized website performance and Core Web Vitals, increasing Lighthouse score from 65 → 92 and reducing LCP by 40%.
 - Built the iBuy feature enabling homeowners to sell properties within 48 hours – <https://onehousing.vn/ky-gui-ban-nha>
 - Developed real estate listing and property posting flows for the marketplace platform – <https://onehousing.vn/mua-ban-bat-dong-san>
 - Built the property valuation tool helping users estimate home values – <https://onehousing.vn/cong-cu/dinh-gia>

- Developed campaign landing pages using Plasmic and Next.js, enabling visual content management for marketing campaigns – <https://moigioi.onehousing.vn>

Project: [OneHousing Maps](#) – *Real Estate Information Lookup via Map Interface*

- Tech stack: Turborepo, Mapbox GL JS, NextJS, ReactJS, TypeScript, Redux, Radix-UI, TailwindCSS.
- Responsibilities:
 - Rebuilt the front-end base architecture for the map platform, improving code structure, scalability, and developer productivity.
 - Built map-based real estate information interfaces using Mapbox GL JS for location-based planning and property lookup.
 - Optimized rendering performance for large geospatial datasets, using virtualized lists and optimized state updates to reduce UI lag.
 - Improved web performance and Core Web Vitals, increasing page speed and interaction responsiveness.
 - Led a team of 4 front-end developers, managing code reviews and coordinating delivery with QA, PM, and design teams.

FPT Software — *Senior Front-end Developer*

09/2022 - 09/2023

Project: [Recruitment Management Portal](#) – *Recruit Group (Japan)*

- Tech stack: TypeScript, NextJS, ReactJS, Redux, Antd, SCSS.
- Responsibilities:
 - Developed a recruitment management portal supporting internal hiring workflows and HR operations.
 - Built interfaces for candidate management, job listings, and recruitment pipelines, handling large datasets.
 - Built a TopCV-style CV generation tool enabling recruiters to create candidate profiles via structured form inputs.
 - Optimized rendering performance for data-heavy dashboards and tables, improving UI responsiveness.
 - Led a team of 5 front-end developers, coordinating tasks and collaborating with QA, PM, and Comtor.

VNLIFE — *Front-end Developer*

05/2020 - 09/2022

Project: [Mytour.vn](#) – *Vietnam's Leading Travel Booking Platform*

- Tech stack: TypeScript, NextJS, ReactJS, Redux, Material-UI, SCSS.
- Responsibilities:
 - Built hotel, flight, and tour booking flows on the Mytour OTA platform, including search, checkout, and VNPay payment integration – <https://mytour.vn>
 - Developed hotel search and booking interfaces for the OTA platform – <https://mytour.vn/khach-san>
 - Implemented flight booking and ticket search experience – <https://mytour.vn/ve-may-bay>
 - Developed the partner onboarding and registration flow for travel providers – <https://mytour.vn/partnership>
 - Built and maintained the Hotel Management Service portal for hotel partners – <https://hms.mytour.vn>
 - Designed a [Booking.com](#)-style availability calendar in the HMS portal optimized for large booking datasets
 - Built an internal WebSocket-based real-time chat service, replacing third-party platforms such

as LiveChat and reducing recurring licensing costs.

PASTIMES AND ACTIVITIES

Outside of work, I am currently developing a custom UI theme and component system for modern web applications – <https://ui.hoagvu.dev/>

I enjoy exploring the latest trends in front-end development and emerging technologies such as AI-driven UI/UX, generative design, and LLM integration into modern web applications.

I regularly follow technical blogs and platforms like Medium, Dev.to, and Quora. Favorite books include Clean Code, The Pragmatic Programmer, and JavaScript Data Structures and Algorithms.

Recently, I have been experimenting with AI APIs (OpenAI, Hugging Face) and exploring ways to bring intelligent behavior to frontend experience
